HOWARD UNIVERSITY ALTERNATIVE SPRING BREAK

A 'spring break' special for seniors

By CHRIS FELKER The Sun Reporter

Around 100 students from the Washington, D.C., university visited Glades schools and other community institutions in small groups all last week, interacting with children and seniors alike as part of their "Alternative Spring Break." Tania Bridges of Long Beach, CA, a Howard sophomore student studying business management, was leading the 15 who participated in activities with WCSC clients. She said, "I printed out some plays and had my participants act them out and they (the senior citizens) wanted to know more about our school, so we did a little skit about our school, too. They really liked it." WCSC Director Willie A. Miller thanked the youths and treated them to pizza for lunch. "The students had a strong desire to help out, and their visit gave them a concrete way to do so," he said. "Servant leadership is an ingredient in the development of young people, and Howard University students certainly have demonstrated this value."

A full day of service for **The Glades Ebonique Ladies** (**GELS**). First stop, the West County Senior Center, where we worked hand in hand with the students from Howard University. We celebrated Easter with the students, making personal Easter cards for the Seniors. The seniors had an Easter Egg coloring contest, and they played bingo and received personal items to include cleaning supplies, scarves, Fabuloso, dish cloths and detergent.

The Howard students assisted us in showing much LOVE to the seniors! One of the students suggested that middle and high school students should volunteer with the seniors as a part of their volunteer requirements.

One of the sweetest moments was to hear one of the students admit that this was the first time she had ever colored eggs for Easter.

THE HEALTH AND WELLNESS MINUTE

Healthy Joints

By DARRYL T. LINDER, D.C. Guest Writer

Lack of exercise is one reason that osteoarthritis is becoming so common in society. When I was a child, we did not have PlayStation, Internet access, or DVD players. We could not wait to be done with dinner and homework to get outside and play—no matter the weather. The children of today (as well as adults) spend more time at home sitting than ever before; this contributes to the increase of obesity, type 2 diabetes, and, yes, osteoarthritis.

In an unhealthy joint, as with osteoarthritis, the cartilage has become rough and pitted. Calcium deposits also build up, and that restricts movement and causes pain.

As we age past puberty, any time the ligaments in the joints are damaged, they are replaced by scar tissue. The problem with scar tissue is that it is weaker. less flexible and more pain-sensitive than the ligament it replaces. People can sometimes predict weather patterns with changes in barometric pressure because of the scar tissue. Chiropractic helps by getting the joint into motion (an adjustment). An adjustment moves the scar tissue and increases blood flow to the joint. That movement brings in nutrients that are in the blood to aid the joint in healing. The chiropractic adjustment also decreases the inflammation in the joint. As a chiropractor, I use the patient's history, an extensive physical exam and x-rays to develop a care plan that starts my patients on the road to better health.
