SKIDMORE SCOOP

OFFICIAL PUBLICATION OF HOUSE DISTRICT 81

Final Interim Committee Week - Tallahassee

This last week of Interim Committee Meetings was eventful. In the Health Care Appropriations Subcommittee, members listened to presentations from the Agency

for Health Care Administration and had a panel discussion on Florida Hospital and Nursing Home Financial Health. Redistricting was also a major top of discussion. State legislators are required to redraw state and congressional district boundaries every ten years based on census data. In a workshop setting, Congressional Redistricting Subcommittee members were provided an overview of two potential maps and given an opportunity to ask the mappers questions on the differences. As the subcommittee will not meet again until the legislative session begins in January, we will use the interim to individually analyze the impact of the 28 districts on communities and recommend changes.
